

The scatter plot displays the relationship between the Adjusted Rehospitalization Rate (%) on the y-axis and the Number of Discharges Considered on the x-axis. A red horizontal line at approximately 12.2% indicates the average rate across all hospitals/clinics. Data points are categorized as follows:

- Ergebnis im Normbereich (Dark Grey):** Most data points fall within this range, showing rates between 10% and 14% for discharge counts between 100 and 1,100.
- Ergebnis tiefer als Vergleichswert (Light Green):** Four points are below the average line, with rates around 6.8%, 8%, 9%, and 9.1%.
- Ergebnis höher als Vergleichswert (Orange):** Seven points are above the average line, with rates ranging from 14.7% to 20.7%.

A single dark grey point at approximately (300, 13.6%) is highlighted with a red border, indicating a specific hospital or clinic of interest.
