

The scatter plot displays the relationship between the number of considered discharges (x-axis) and the adjusted rehospitalization rate (y-axis). The x-axis ranges from 0 to 25,000, and the y-axis ranges from 0 to 14. A red horizontal line at 6% indicates the average rate across all hospitals/clinics. Data points are categorized as follows:

- Ergebnis tiefer als Vergleichswert (Result below comparison value)
- Ergebnis im Normbereich (Result in normal range)
- Ergebnis höher als Vergleichswert (Result above comparison value)

A red circle highlights a specific data point at approximately 1,000 discharges and 4.2% rate.
