

The scatter plot displays the Adjusted Rehospitalization Rate (%) on the y-axis (ranging from 0 to 14) against the Number of Considered Discharges on the x-axis (ranging from 0 to 25,000). A red horizontal line at 6% indicates the average rate across all hospitals/clinics. Data points are categorized by color: green for results below the average, grey for results within the normal range, and orange for results above the average. A red circle highlights a specific data point at approximately 1,500 discharges and a 5% rate.

Legend:

- Durchschnitt adjustierte Rehospitalisationsrate aller Spitäler/Kliniken (Vergleichswert)
- Ergebnis im Normbereich
- Ergebnis tiefer als Vergleichswert
- Ergebnis höher als Vergleichswert
